

OUSSAMA MOSBAH

Front-End Developer

+216 20009536 | mosbahoussama19@gmail.com | Sousse, Tunisia | linkedin.com/in/mosbah-oussama

PROFESSIONAL SUMMARY

Front-End Engineer with 3+ years of experience delivering scalable, production-grade web applications across SaaS, fintech, e-commerce, and e-learning sectors. Specialized in React.js/Next.js with a strong foundation in component-driven architecture, secure payment integrations, and responsive UI/UX design. Proven ability to ship clean, maintainable code in Agile environments while collaborating effectively across cross-functional teams.

CORE COMPETENCIES

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, CSS3, Dart

Frameworks & Libraries: React.js, Next.js, Material UI, Redux Toolkit

APIs & Integrations: REST API, Stripe API, Firebase, MyFatoorah API

Testing: Jest, React Testing Library, Unit & Integration Testing

Tools & Platforms: Git, GitLab, GitHub, Postman, Swagger, VS Code, ClickUp, Figma

Methodologies: Agile/Scrum, Code Review, Clean Architecture, DRY, KISS, SOLID

AI & Dev Tools: Claude API, Cursor IDE, Prompt Engineering, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Front-End Developer | Astrolab Agency

January 2023 – Present • Sousse, Tunisia

Mission 1 – Sweetees | Gift Cards & Concert Ticketing Platform

- Led the design and development of a dual-interface web application (Manager and Admin portals) serving 200+ registered users across 3 distinct access roles — tailored dashboards with granular permission management per role
- Architected a multi-role authentication system using JWT tokens and role-based access control (RBAC), ensuring secure and seamless session handling across all user categories
- Integrated the Stripe payment gateway handling 100+ monthly transactions for gift card purchases and concert tickets, with real-time confirmation, error handling, and webhook event processing
- Maintained detailed technical documentation and participated in full Agile ceremonies (sprint planning, daily stand-ups, code reviews) using ClickUp and GitLab CI/CD pipelines

Tech Stack: React.js, TypeScript, Material UI, Stripe API, GitLab, ClickUp, HTML5, CSS3

Mission 2 – AGCFF | Gulf Region Football Tournament Management Platform

- Developed fully responsive user interfaces (Responsive Design) for three user profiles — organizers, clubs, and federations — supporting multi-tournament management with real-time match scheduling and live results
- Engineered an automated PDF generation pipeline for official match reports and competition documents, significantly reducing manual administrative workload for federation staff
- Designed and executed a unit and integration testing strategy achieving 75%+ code coverage on all critical data-handling modules
- Enforced clean code standards (DRY, KISS, naming conventions) through peer code reviews and AI-assisted development (Cursor, Claude) to improve code quality and accelerate feature delivery

Tech Stack: React.js, TypeScript, Material UI, GitHub, ClickUp, HTML5, CSS3

Mission 3 – Champion Mind | Online E-Learning Platform

- Designed and built a dual-portal e-learning platform: an instructor dashboard for creating and publishing courses, quizzes, and learning modules, and a student interface for accessing content and completing online assessments
- Implemented 20+ interactive learning modules with a real-time quiz engine, automated grading, and performance tracking for both students and instructors
- Ensured full cross-device responsiveness using mobile-first strategies, coordinated with backend engineers for seamless REST API data flows, and used AI tools (Claude, Cursor) to optimize component generation and debug complex UI logic

Tech Stack: React.js, TypeScript, Material UI, REST API, HTML5, CSS3

Mission 4 – Eldo Wallet | Digital Loyalty & Mobile Wallet SaaS Platform

- Engineered a feature-rich merchant dashboard enabling businesses to design, publish, and manage digital loyalty cards, tickets, and coupons distributed directly into Apple Wallet and Google Wallet — eliminating the need for a dedicated mobile app and cutting onboarding friction for end users
- Implemented real-time pass update engine and geolocated push notification system, allowing merchants to instantly push personalized offers, loyalty points, and event updates to customers' smartphones — driving a 72% opt-in rate and 35% cost reduction compared to traditional SMS campaigns
- Developed interactive analytics dashboards with data visualization components tracking key campaign KPIs — 72% opt-in rate and 35% cost reduction vs. SMS marketing — giving marketing teams full visibility over campaign performance across retail chains, restaurants, municipalities, and museums

Tech Stack: React.js, TypeScript, Material UI, Stripe API, REST API, GitLab, HTML5, CSS3

Front-End Developer (Co-op) | NEXYM

February 2022 – December 2022 • Monastir, Tunisia

- Developed the Sarabapp e-commerce platform using Next.js with SSR, delivering measurably faster page loads and significantly improved SEO performance compared to a client-side React SPA
- Integrated the MyFatoorah payment API delivering a secure, localized checkout experience tailored to Middle Eastern markets with multi-currency support
- Designed and implemented 10+ animated UI components, improving overall user engagement and contributing to a smoother browsing and purchasing experience

Tech Stack: Next.js, TypeScript, Material UI, MyFatoorah API, GitLab, ClickUp, HTML5, CSS3

Front-End Developer Intern | ZenHosting

July 2021 – October 2021 • Sousse, Tunisia

- Built the EeKad news platform (homepage, article pages, categories, user profiles) with Firebase authentication and REST API integration for dynamic content retrieval — delivering a seamless reading experience with role-based access for contributors and administrators
- Optimized front-end performance through lazy loading, code splitting, and asset compression, achieving Lighthouse scores above 90; authored technical documentation and user guides for the platform's editorial team

Tech Stack: React.js, Firebase, REST API, Material UI, GitLab, Jira, JavaScript, HTML5, CSS3

Embedded Systems Intern (PFE) | Dräxlmaier Group

January 2020 – July 2020 • Sousse, Tunisia

- Developed an intelligent real-time crimping anomaly detection system using a YOLO model deployed on Raspberry Pi, achieving 90%+ detection accuracy in field tests
- Built a Java Swing supervision interface to visualize detection data and alert operators, and authored complete technical documentation for handover and maintenance

Tech Stack: Python, YOLO, Machine Learning, Raspberry Pi, Java Swing

EDUCATION

Bachelor of Engineering – Software Engineering

EPI Digital School | 2023

Applied Bachelor's Degree – Embedded & Mobile Systems

Institut Supérieur des Études Technologiques de Sousse | 2020
